

LINK-BIOBAY TOKYO

LINK-BioBAY TOKYO is ...

A collaborative initiative of LINK-J, BioLabs and Mitsui Fudosan aiming to

- Nurture life science startups that can scale at a global level
- Establish an innovation ecosystem connected to the global markets

Cluster globalization

- Linking to the global ecosystem

Cluster expansion

- Attracting new cluster constituent companies
- Co-organizing events with other clusters

Start-up support

- Providing mentoring and incubation program
- Providing opportunities for start-ups to have collisions
- Providing lab space, lab equipment, facilities, and business support programs

Information distribution and branding

- Sharing information domestically and internationally, using the LINK-J platform, and social media, such as LinkedIn
- Sharing opportunities for exposure at both domestic and international events

Call for startups! The Masterclass Program by BioLabs

As part of our supports, we will launch The Masterclass Program by BioLabs - Cohort 2. We welcome applications from life sciences startups aiming for global growth.

Benefits

- Online webinars: 6 times
- Online mentorings: 8 times
- Online pitch coaching: 2 times
- On-site workshops
- An opportunity to present at a demo day attended by corporations and investors
- Additional exposure opportunities through LINK-J activities (planned)
