Biologics Testing Solutions

Facilities and Capabilities

Drive confident decisions with fast, reliable testing solutions.

Visit criver.com/biologics →

Bringing a biologic therapy to market requires more than accurate results. It demands speed, scientific rigor, and deep regulatory insight. From method development through GMP release and stability testing, our global network of compliant facilities supports a wide range of biologic modalities, including antibodies/proteins, vaccines, and cell and gene therapies. With fast turnaround times and expert project oversight, we ensure your programs stay on track, aligned with evolving global regulations, and ready for submission.
